

# **R SUBRAMANIAN FELLOWSHIP AWARDS**

*Scientific Research on Glass And Glazing*

## ***In Memory of Our Founder Chairman Mr R Subramanian***

*Connecting Academia is the  
key to Future of Technology  
in Glass and Glazing  
Industry*

Mr R Subramanian - A Proficient Leader and Guide in building Glazing Society of India as an independent, inclusive technical organization for Glass and Glazing in India. He was the Chairman of Glazing Society of India for 10 years from April 2009 to March 2019.

## R Subramanian Fellowship Award

The extensive usage of glass in Indian Buildings over the last few decades has created many opportunities and avenues in the areas of research and study on the unexplored areas, challenges, advancements and the next level of excellence.

GSI has launched the R Subramanian Fellowship Award to encourage and build research and study on glass, profiles, glass façade and fenestration, associated materials and glass buildings in India.

The research fellowship will focus on the quality, performance, innovations, applications and functional aspects of glazing materials and buildings.

The program is supported by the entire Indian Glass and Glazing Industry. The program is designed for Institutions with Post Graduate Students and Phd Scholars in the areas of Architecture, Engineering and Technical Studies.

## The GSI Support

- Monetary support of up-to Rs 1.5 Lakhs for each award
- Technical support from Glass and Glazing Industry during the entire course of the research
- Recognition and credibility

## Benefits and Duration

- The program gives an immense opportunity for Institutions and their students to work closely with Glass and Glazing Industry.
- Opportunity for Plant Visits and technical guidance from Industry
- Duration of one Research study / project: 6 – 10 Months

For Research Topics, Eligibility, Application Form, Process, Timeline, last date for submission of abstracts and other details, please refer the Annexure A

## About GSI

Glazing Society of India (GSI) is an independent, not-for-profit technical Organization working on Testing, Research, Regulations, Education, Codes and Certifications of Architectural Glass, Glazing systems and its associated materials for performance in the areas of Energy, Safety, Structural integrity, Acoustics, Fire Resistance and others.

GSI has collaborated with the respective eminent academic and government institutions and established the following three state-of-the-art, world class research and testing facilities in India.

- Structural Glass Research and Testing (SGRT) Facility, Structural Laboratory, Department of Civil Engineering, Indian Institute of Technology Madras (IITM) in Chennai.
- Architectural Glass Research and Testing (AGRT) Facility, CSIR – Centre for Glass and Ceramic Research Institute (CGCRI) in Kolkata
- Centre for Advanced Research in Building Science and Energy (CARBSE), CRDF, CEPT University in Ahmedabad
